

About this consultation

Following our statutory consultation in 2018 and non-statutory supplementary consultation in early 2020, we are proposing a number of design refinements to the Lower Thames Crossing.

This design refinement consultation is the latest stage in the planning process. It is an opportunity for you to have your say on the changes we have made since our non-statutory consultation in January 2020.

We want to get all aspects of the design, construction and operation of the Lower Thames Crossing right. Your views play a vital role in helping us shape the project.

When we submit our Development Consent Order application to the Planning Inspectorate later this year, we will include a Consultation Report that explains whether, and how, we have changed the proposals in response to feedback received from our previous consultations and this design refinement consultation.

Please submit your response by 23:59 on 12 August 2020.
